

Meeting times

- Tuesday (Nov. 4): 8-12 @SH
- Friday (Nov. 7): 3-7 @OH
- Sunday (Nov. 9): 12-7 @Theta
- Tuesday (Nov.11): 11-Chapter @Theta

Goals

Is it acceptable for one or two team members to do more work than the others in order to get the team an A?

- We will be dividing the work evenly and everyone will be required to complete their tasks

What are the goals of the team?

- Functional, well tested, well commented, beautiful code

What happens if all of you decide you want to get an A grade, but because of time constraints, one person decides that a B will be acceptable?

- We all agree to put in 35 hours of work if need be.

Meeting Norms

How will we use the in-class time?

- Check in with Lydia
- Treat it the same way as our meeting times

Work Norms

How much work will be distributed?

- We will divide the project into three portions. Each team member will be assigned to test, implement, and review a different portion.

Where will you record who is responsible for which tasks?

- We will have a ToDo list in our repo which we will keep updated

What will happen if someone does not follow through on a commitment?

- This will be highlighted in our reflections

What happens if people have different opinions on the quality of the work?

- The three-division-system will act as quality-control

How will you deal with different work habits of individual team members?

- We have designated group meeting times which we agreed on together

Decision Making

Do you need consensus (100% approval of all team members) before making a decision?

- We will go through all the specs together. 100% approval will only be needed if a spec is changed or a new public method is added during implementation.

What will you do if one of you fixates on a particular idea?

- Bring it to the TA
- Pro-Con list
